QR TABLE ORDERING · MANUAL

What QR ordering can do for your restaurant

რას გაძლევთ QR შეკვეთა — ინსტრუქცია

What you can do with it · რისი გაკეთება შეგიძლიათ

- Guests order from their own phone at the table — no waiting for a waiter.
  სტუმარი უკვეთავს საკუთარი ტელეფონით, ოფიციანტის ლოდინის გარეშე.
- The order arrives on your kitchen/staff screen at once, with the table number and a sound.
  შეკვეთა მაშინვე მოდის ეკრანზე მაგიდის ნომრით და ხმით.
- Menu with photos and GEL prices in 6 languages: English, Georgian, Russian, Chinese, Korean, Japanese.
  მენიუ ფოტოებით, 6 ენაზე.
- "Call staff", "Plates & cutlery" and "Bill" buttons for guests.
  ღილაკები: პერსონალის გამოძახება, ჭურჭელი, ანგარიში.
- Sold out in one tap. Daily sales by item, card and cash, exported as CSV.
  "ამოიწურა" ერთი შეხებით; დღიური გაყიდვები CSV-ში.

How it starts · როგორ ვიწყებთ

1. Send us your menu (photo or PDF) on WhatsApp.
2. We enter your dishes, photos and prices, and print the table QR codes.
3. We come to your restaurant, set up the staff screen (phone, tablet or PC) and show your staff how to use it (about 30 minutes).
4. You use it free for the first month. If it does not help, just stop — no contract needed for the trial.

Price after the free month · ფასი

Start · 49 ₾/month	QR ordering, call staff, bill request, 6 languages. You edit the menu.
Standard · 99 ₾/month	Start + we enter your menu and photos, print QR codes, train staff and come to fix things.
All-in · 199 ₾/month	Standard + hygiene (HACCP) records, staff shifts and sales reports.

The next pages show the real screens we use every day at Japan Food Hub (3 restaurants in one food hall). Your version shows only your restaurant and your menu.

Kyohei Mikami · Omurice Land (OMURICELAND LLC) · Japan Food Hub, 1 Davit Gamrekeli St, Saburtalo
WhatsApp +81 90 8708 0598 · admin@omeletrice.com · Demo: tbilisi.omeletrice.com/qr-order.html

Guests order from the QR code on their table and pay at the counter by card or cash (online payment is not available yet). When staff press **Close bill**, the payment method and each shop's sales are recorded. Import those sales into the books, and at the end of the month you get the payout for each shop.

The guest's screen

Scanning the table QR opens the order page for that table. The language button at the top right switches between English, Georgian, Russian, Chinese, Korean and Japanese.

1. **Choose a shop and add dishes**: dishes from the 3 shops and drinks go into one cart.

The "Call staff" and "Plates & cutlery" buttons also appear on the kitchen screen.

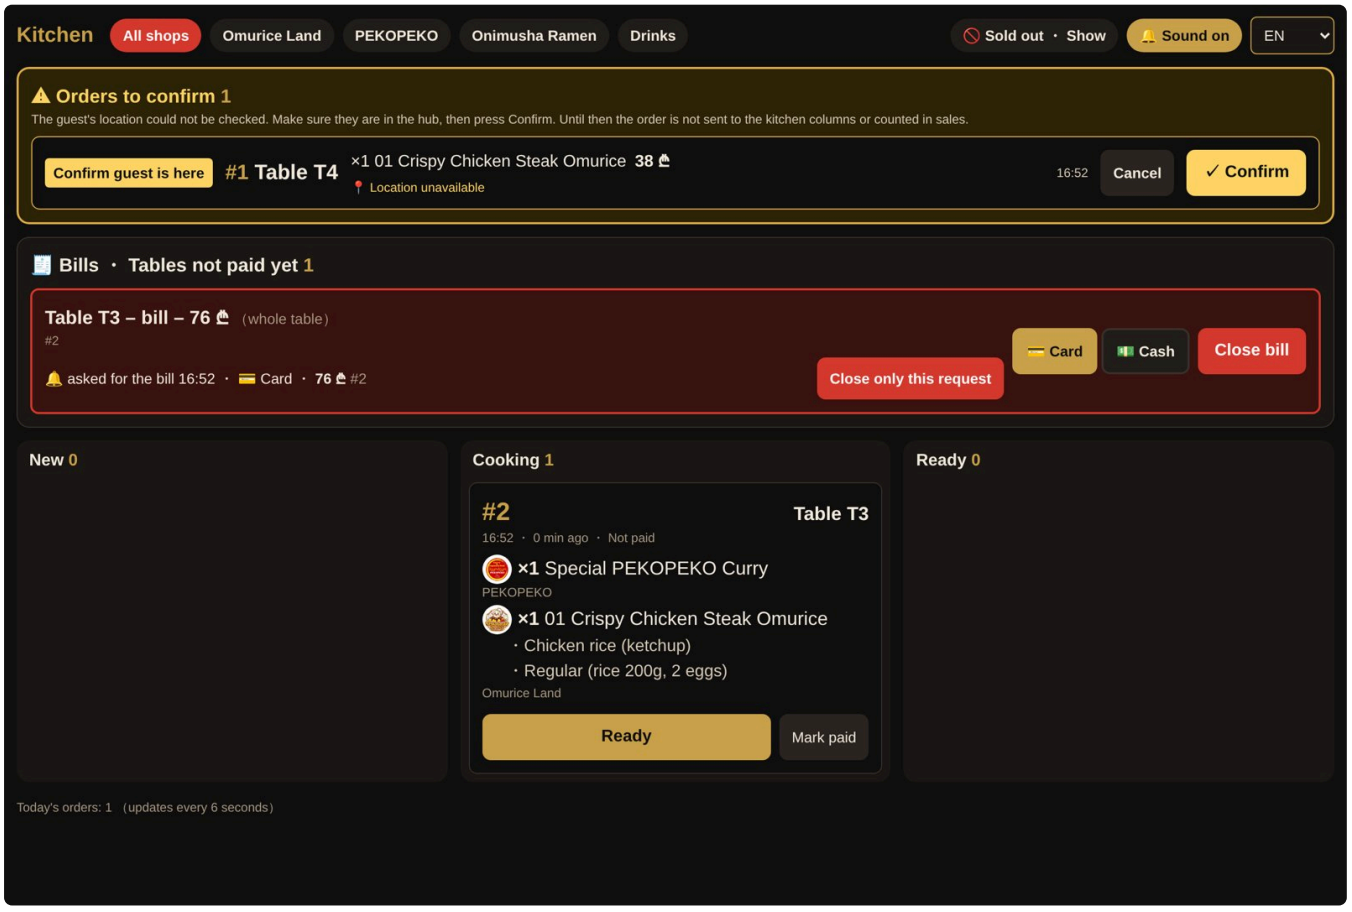

The kitchen screen

Open **restaurant-hq.vercel.app/kitchen**, enter the staff PIN and tap **Tap to start** (this turns the sound on). The buttons at the top show all shops or only your shop.

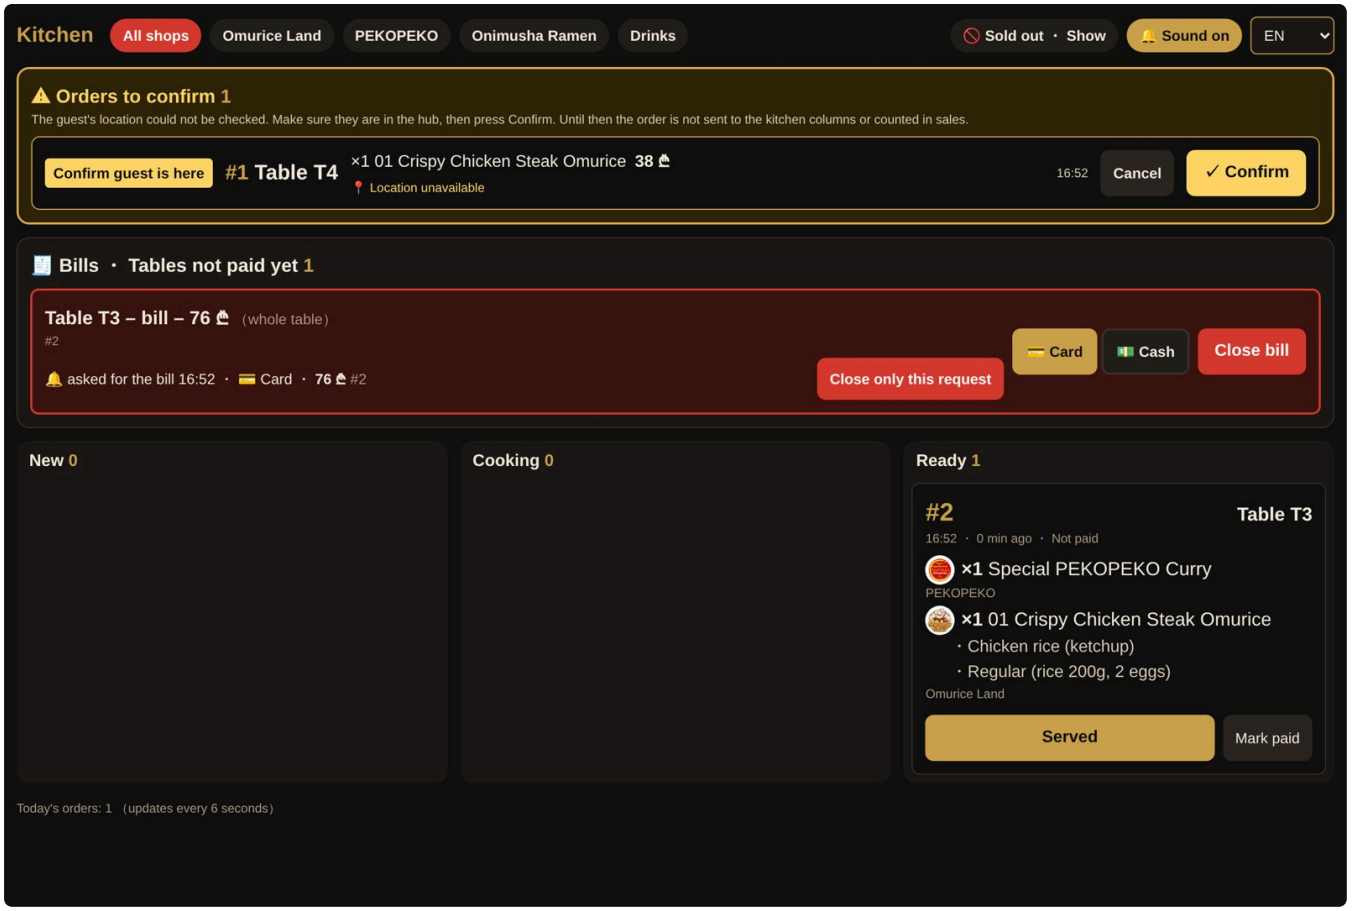

1. **New** → tap **Start** when you begin cooking. Red bill boxes and yellow "Orders to confirm" boxes also appear on this screen.

2. **Cooking** → tap **Ready** when the food is ready.

3. **Ready** → tap **Served** after taking it to the table. The order leaves the screen.

4. **Bill**: when a guest requests the bill, a red box shows the table, amount and payment method. After you take the payment at the counter, choose what you actually received (**Card** or **Cash**) and tap **Close bill**. **This button is what records the sale.**

- **Orders to confirm** (yellow box): the guest's location was far from the shop or could not be read. Check that the guest is inside, then tap **Confirm**. Until then the order does not go to the kitchen and is not counted in sales.
- **Wrong order**: tap **Cancel**. Cancelled orders are not counted in sales.
- **Sold out**: use **Sold out** at the top.
